AT THE STATE FAIR.

GOVERNOR FLOWER VISITS THE SYRACUSE

THE BUILDINGS CROWDED WITH EXHIBITS OF GREAT INTEREST-PROGRAMME OF THE RACES-A LARGE ATTENDANCE

EXPECTED. Syracuse, N. Y., Sept. 16.—Governor Flower to-day visited the State fair in this city, and a vast crowd of people from Central New-York came out under gloomy skies and in the face of intermittent rain gloomy skies and in the face of intermittent rain to see the show and hear the Governor speak. The distinguished visitor of the day came from Albany with a military escort, and was hailed with booming cannon. Governor Flower had prepared a speech on the relations of the money panic to the farmers, and copies of it had been mailed to the press, but he delivered not one word of this effort, confining his eloquence to a description of the New-York State exhibit at the World's Fair. The audi-

ence was deeply interested.

Rallway travellers approaching this city from the west must notice a remarkable group of buildings upon a beautiful green meadow near the western edge of the city, Intervening between the city and this meadow is Onondaga Lake, about a mile in width and stretching to the northward five or six miles. The houses and factories of Syracuse touch upon its eastern but west and north a fine farming country borders the lake and beautifies it.

The buildings are those of the State Agricultural Society, and in them have been held yearly for sev-eral years past, or since the State fair "boarded around" at a different city each year, the annual State fair of that organization. When the system of annual migration was in operation the buildings in the various cities visited by the State fair were of a shabby character. No adequate exhibition of the farm products and farm animals of the State or of agricultural implements could be made in them. But when it was determined by a State law that the State fair should be held annually in Syracuse, the State Agricultural Society feit that it could prudently erect buildings of a permanent nature, ornamental and at the same time appropriate for the State fair. No finer site could have been selected. Syracuse is in the centre of the State. The grounds are beautifully situated, with Onon-daga Lake in view upon one side, a fine farming country on the other and with the green hills of Onondaga County looking down upon the grounds from the southward.

The visitor to the State Fair this year finds that since the last Pair was held several handsome buildings have been erected, at a cost of \$25,000. These are a Floral Hall, for the exhibition of flowers and fruit; a barn, a poultry-house and a dairy-house, for the exhibition of butter and cheese. Overlooking the grounds from the railway tracks every hand the busy hum of labor was hushed out of the New-York Central, which runs along the upland, one notices the admirable plan of the buildings in which horses, cattle and sheep are exhibited. These buildings are placed relatively to each other in zigzag shape, or in much like the shape of the old "snake fence." In other words, the buildings are so placed that a visitor can begin at the end of the line of these buildings and pass from one into the other until every building has been visited. If the weather is inclement or the day is hot the visitor thus is saved from exposure to rain or the sun's rays, and moreover loses no time in going over the ground from one building into other. Separate from these buildings is a street upon which are grouped the buildings and tents of the dealers in wagons, ploughs, furnaces, farm stores, dry goods and farming implements generally. This street is also the Midway Plaisance of the Fair. Here are the pop-corn venders, the fac-simile cow that gives down milk every hour in the day at 5 cents a glass, the candy man, the hot-corn man and the vender of whips. But there is no Cairo theatre; no Old Vienna, with an orchestra playing waitzes and an overabundance of beer. Upon the contrary, there are several large tents with big signs upon them stating that within are lunch counters at the Woman's Christian Temperance Union. It is needless to say that nothing more intoxicating than good coffee is sold in these tents by the benevolent-looking women of the Woman's Christian Temperance Union.

The Administration Building is a neat cottage of one story painted brown and with broad verandas. There one may find daily John B. Dutcher, of 'Pawling, Dutchess County, the president of the State Agricultural Society. Mr. Dutcher besides being a railroad magnate is a breeder of horses. "I think," he said to-day, "that with good weather we shall have a fairly large attendance this year.
The hard times will deter some people from coming, but our exhibits are so much larger than usual and so much more interesting that I believe we shall have many thousands of people here. Yearly this State Fair is growing in importance, and in my opinion is held in higher esteem by the public. Yearly we add new buildings, and yearly we are troubled to know what to do with the articles sent to us for exhibition. Our Floral Hall this year is overcrowded with flowers and falls, and we have no room in it for the exhibition of vegetables. We have had to put up a tent for the vegetable exhibits. Our poultry building also is crowded to overflowing with the cages of hens, geese, turkeys, ducks and other fowls. The policy of having the State Fair held in one place year after year has already proved to be a good one in my opinion, and as time passes and we erect more buildings and the Fair grows, that policy will be looked upon by the State with more and more satisfaction." Hundreds of people from Syracuse and from else-

where in the State have already visited the Fair, and have declared it a most excellent one. The and have declared it a most excellent one. The races for the remaining days of the Fair (it will not close until sunset on September 21) will of themselves attract thousands of persons. There is a fine race-track upon the ground and a large grandstand. The managers of the Fair think that they have rarely attracted to the Fair so many first-class horses. The purses amount to \$3,150. Yesterday there was a race for foals of 1892, onehalf mile heats, best two in three, for a purse of \$150; a purse of \$500 for horses of the 2:22 class and a purse of \$150 for foals of 1891, one-mile heats, best two in three. To-day, Governor's Day, there was a purse of \$300 for the 2:37 class, and a purse of \$200 for foals of 1890. On Monday there will be a purse of \$300 for trotters of 1850, mile heats, best three in five, and a purse of \$400 for the 2:29 class, trotting horses. The manugers of the fair say that there are 25 per cent more horses on exhibition than at the World's Fair in Chicago.

The exhibition of horses this year is an especially tine one. There are exhibits of Clydesdales, stal-Hons, brood mares and fillies; English Shire stallions, Percheron sires, brood mares and fillies; French coach sires, stallions, brood mares, foals and fillies; Cleveland bay sires, stallions and fillies, hackney stallions, thoroughbred stallions and fil-

French coach sires, stallions, brood mares, foals and fillies; Cleveland bay sires, stallions and fillies, hackney stallions, thoroughbred stallions and fillies, standard-bred horses, stallions, mares, fillies and foals; carriage and coach mares, foals and lillies; farm mares, fillies and foals; Shetland ponies, harness and saddle horses and phaeton horses. Perhaps the most notlevably large exhibits are those of Percherons and French coach stallions and mares. There is also a fine exhibit of Shetland stallions and mares. All the leading varieties of cattle are exhibited, and most of the leading cattle raisers of the State have exhibits of their Shorthorns, Devons, Herefords, Aberdeen-Angus, Red Poils, Holstein-Friesians, Dutch belted, Ayrshire, Jerseys and Guernseys, A fine exhibit of Guernsey buils one year old, of Guernsey buils caver over five months old and of Guernsey cows over fur months old and of Guernsey cows over fur wears old is made by G. Howard Davison, of Altamont Stock Farm, Millibrook, Cornell University makes a good exhibit of high-strade cows descended from native dams and thoroughbred sires. Among the cattle raisers who have exhibits are Thomas Brook & Son, Gerry, A. M. Kent, of Jamestown; J. Hilton & Sons, of New-Scotland, G. O. Halcomb, of Troy, Penn.; P. B. Buckley, of Valley Falls; Goodwin & Judy, of West Lebanon, Ind.; B. F. Nutlins, of Woodville; D. B. Dunning, of Chazy; William Rood, of Binghamton; Smiths & Powell Company, of Syracuse; John G. Sanford, of Goshen; E. H. & C. S. Buney, of Miford; T. R. Proctor, of Utlea; A. H. Cooley, of Little Britain; W. W. Weed & Sons, of Potsdam, and R. A. Borden, of Easton.

The exhibit of sheep and swine is excellent, the leading stock farms being represented.

Floral Hall is a favorite resort of the visitors. Here one may find a far finer exhibit of the State hair in August Perhaps it was too early in August for New-York to exhibit her varieties of fruit, but at least the display at Chicago was contemptible compared to that which was being made at

CUT SQUARELY IN TWO.

A TANK STEAMER RUSHES THROUGH THE TUG TALISMAN.

ONE OF THE TUG'S CREW DROWNED-CONFLICT-ING STORIES AS TO WILL IS RESPON-

SIBLE FOR THE ACCIDENT. The collision in the Lower Bay yesterday morning between the British steamship Delaware and the tug Talisman, by which the latter was sunk and one of her crew drowned, was one of those marine disasters for which there seems to be neither excuse nor reason. Two vessels, both under control, in broad daylight, on a smooth sea and with plenty of searcom, came into collision with each other with

disastrous results. The Talisman, one of the fastest tugs in New-York Harbor, owned and commanded by Captain Charles Minnert, was cruising around the Bar in the early morning. Shortly after 10 o'clock a station pilot boat which had broken from anchorage luring the night signalled to the tug to come and tow her back to her proper position. The Talisman took the boat's line and started with her across

Gedney's Channel. Meanwhile the Delaware, fifteen days from London, commanded by Captain Thomas, was coming up the channel in charge of Pilot F. Armstrong. What signals, if any, passed between the tug and the steamer is a disputed point. At any rate, neither changed its course, and as a result the Delaware struck the tug at right angles on the latter's port side, rolling her over and cutting through her. The tug sank like a stone, and the steamer went on, pressing the broken halves still deeper beneath the water. Life buoys were thrown from the Delaware to the crew of the tug as they strug-THOUSANDS OF PEOPLE PAY TRIBUTE TO HIS gled in the water, and all but one were saved. The said to belong to Brooklyn. The great roaring fires of the factories were banked, the mills were all idle and on the factories were banked, the mills were all idle and on the sabbath. They were then taken to Quarantine and thence to the Marine Hospital. Captain Minnert's arm was of respect for the memory of him who had done so broken in the collision. P. Armstrong, the pilot who was in charge of the Delaware at the time, seemed greatly depressed. He said that it was raining hard, and that when he saw the tur it was too late to avoid a collision. He considered that the tug was entirely to blame for having tried to cross his bows without warning.

The Talisman was about twelve years old, and was valued at about \$8.00. She will be a fotal loss, as it will be impossible to raise any part of her. The Delaware was not injured, so far as is known.

ANARCHISTIC UTTERANCES HISSED Buffalo, Sept '16.—Three thousand people gathered at the Parade House last night to listen to harangues upon socialism. One half surrounded the wagon, from which the speeches were delivered in the Polish language, and the other half was divided between the English and German meetings. The gathering was an orderly one, and did not sympathize strongly with the rabid views of the speakers, for when the latter became too flery in their utterances they were soundly hissed.

The starting gun was fired a 12:45 p. m. yesterday. The Britannia crossed the line three minutes ahead of the Navahoe, but, a it had been arranged that the vessels should get off as nearly together as possible, she was recalled for another start. When the second gun was fired the Navahoe led away, but she crossed the line only ten seconds in advance of the Britannia. The wind, which was light from first to last during the race, came from the southwest at the start, but in the night shifted to the east. As the ver sels passed out of sight both were carrying their jackyard topsails and jib topsails, as they continued to do to the finish. The Channel was smooth

The Britannia got the lead almost immediately, and passed the Needles at 1:02:37, the Navahoe following at 1:6.15. She was still drawing ahead when both went out of view, heading a little west of south. The fog, which had settled over land and sea well before the start, did not lift during the night. Soon after 3 o'clock there were a few signs of clearing, but not until the vessel reached Cherbourg, at 5 o'clock this morning, was it possible to any considerable distance on the course

FOOTBALL AT WEST POINT.

PROBABLE COMPOSITION OF THE TEAM. West Point, Sept. 16 (Special).—The cadets are leaving nothing undone to secure a football team that will bring back West Point's glory and place them on an equal footing with their rival brethren of the Navy. The first year that the Annapolis cadets visited West Point, a score of 24 to 0 proclaimed them superior football players to the boys in gray. Mortified by this overwhelming defeat, the soldier lads put forth their best efforts, and on the field at Annapolis won back their lost prestige by a score of 32 to 16. Up to this time the world took little interest in their games. Suddenly it dawned upon the people that two schools existed which always furnished in time of trouble defenders

of the Nation. The Yale, Harvard and Princeton games had been until last year the chief attraction for football admirers. The Army and Navy had each won a game. The military authorities were loath to favor an institution which they considered

detrimental to soldierly training and studies, but wiser counsels prevailed and another match was arranged. West Point was defeated for the second time on the home grounds by a score of 12 to 4. The crowd gathered to witness the game was the largest ever seen at the post. Football between the acad-

NO NEWS OF THE ABSCONDING CASHIERS

THE POLICE SEARCH IN VAIN FOR THE DIS-HONEST EMPLOYES OF THE LOTOS AND REFORM CLUBS-ONE SUPPOSED

TO BE IN CANADA. No tidings have yet been received of the abconding cashlers of the Lotos Club and the Reform Club. The cases have been put in charge of the police, but so far all efforts to find the have been in vain. The cashier of the Lotos Club was Henry E. Malway. He disappeared on July 3, taking with him \$1,250 of the club's money, George M. Roe was the cashler of the Reform Club. Malway was formerly the cashier at the Union League Club, and he went to the Lotos Club last spring well recommended. It has always been the cur visit this display of garments even tom of the Lotos Club to put its cashier under bonds, but as Malway came to the club just about the time when it was moving into its new quarthough you do not wish to purchase. ters his bond was overlooked in the hurry attending the moving. Implicit trust was placed in him by the officers of the club. Soon after Malway had disappeared from the city, a shortage \$1,200 was found in the club's books. Malway had been betting heavily on the races and generally lost money. It is thought that he is in Canada, The Reform Club's cubier, George M. Roe, and \$1,500 of the club's funds disappeared on August 31. Louis Windmuller, the treasurer of the club, made out a check for \$1,500 payable to Wallace Mac-farlane, chairman of the House Committee. This amount was to pay employes of the club. Me-Farlane indorsed the check and gave it to the ashler, who subsequently cashed it and then he

disappeared. Roe went to the Reform Club from the Importers and Traders' National Bank, of this city. He was highly recommended, and the club gave him a salary that amounted annually to more than the money which he is supposed to have taken. He lived in Paterson, N. J.

The Fall opening of Siede's old

established Fur House presents for

the consideration of the public one of the largest, finest and most select lines of Fur and Cloth Garments that has ever been exhibited in the United States. You can purchase a garment here at the present time for less money than you usually pay at the end of a season. We do not advertise prices, but will say that we are offering the latest styles in garments, both in fur and cloth, at least 50 per cent. less than you can purchase elsewhere. How can we do this? Everybody is familiar with the late panic. We fortunately had a large amount of cash on hand, and merchants gladly accepted half value for their goods in order to obtain money they so badly needed. This house does a strictly cash business, which enables us to sell at lower prices and less profit than houses that do an extensive credit trade. Our variety of styles are so large that we decided not to publish a catalogue for free distribution, as it would be entirely too cumbersome. It will repay you to
